

POCO has been designed as a sleek slim-line desk-top unit.

POCO mounted vertically takes up less than 50mm of desk space yet is capable of providing all the facilities required in the modern office. POCO is suitable for Hot-desking, as well as personal power.

Based on a unique dual purpose aluminium extrusion, up to 4m long, POCO may be configured with 'modular components' from both our QikFit range and our complete international range (see website) – power, data and AV.

Used in conjunction with underdesk units this can provide a total workstation solution to the customers exact specification.

POCO may also be configured as a screen or tool rail hung unit with brackets available to suit most types of installation.

Standard colours - Natural anodised body - white / grey fascias and end caps.

Other colours available on request – may be subject to minimum order quantity.

Version: 17.07.2012.

poco 70/...

Standard Fixings

- CBV Vertical Clamp Bracket 20 - 35mm
- CBH Horizontal Clamp Bracket 20 - 35mm
- FTL Stick down fixing (Horizontal)
- EB Eared Bracket (Vertical)*
- TRS Tool rail fixing (Vertical)*
- RF Rubber feet (Horizontal)

*Please call to confirm screen/toolrail compatibility

Horizontal

CBH - Horizontal Clamp Bracket

Desk Clamp available for desks with a thickness between 20 and 35mm

Custom brackets available on application

Features

Configuration:

Power only / Data only / Combined (Power & Data/AV)
Internal segregation between Power and Data/AV in combined POCO units

Increased flexibility - All POCOs are supplied with cables exiting the rear. However, side exit facility is available on all vertical units through a snap-out endcap. Side exit choice can be taken on site and does not require disassembly of POCO

Security:

ANTI-FLEX system: Unique full length locking system guarantees unit integrity regardless of length

Testing:

100% testing - continuity, polarity, insulation & earth

Soft Wiring (power)

Power hardwired to Wieland GST connector allows starter cables to be changed to suit requirements, especially useful during moves and changes (CHURN)

Soft Wired Data / AV

As well as soft-wired power, POCO can be supplied with pre-fabricated (100% end-of-line tested) flyleads for data (CAT5e, CAT6, CAT7) and AV connections thereby providing a complete 'plug-and-play' soft wiring solution. If necessary, branded data can be accommodated to retain full channel warranties, please call for advice (see our Soft Wiring Data Brochure)

Soft Fixing

POCO is designed to allow brackets to be changed on-site. Unless stated otherwise, POCO can simply be moved (using the same brkt) or attached to another feature on the desk simply by changing the bracket

Screen Fixing

Screen/toolrail fixings can be provided to suit most applications - call our technical team for advice on which to use

Angled data fascias allow data cabling to pass straight through POCO, ensuring the integrity of cables which have a minimum bend radii (CAT5e, CAT6, etc)

Vertical CBV - Vertical Clamp Bracket
Vertical clamps are available for desk thicknesses between 13mm and 55mm
