

The Elsafe runner cable tray series is designed to manage all of the cables, power and data into one tidy and discrete location, which enables maximum desk space and eliminates the problem of messy and unsightly cables under the desk.

There are two styles of cable trays available within the Elsafe runner cable tray series.

- The Single Tiered Cable Tray: This is a perfect solution for tidying up the loose and unsightly cables under a desk.
- The Double Tiered Cable Tray: This tray is designed to allow separation of the power and data cables using the double tiered system also keeping the cables under the desk in one tidy location

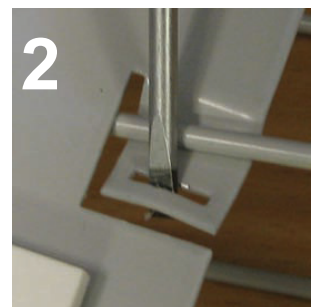

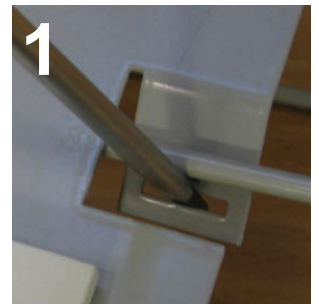

The Double tiered cable tray can be used on its own as a cable tidy and separation system or it can be used in conjunction with the Elsafe basket panels. The basket panels are designed to accommodate the Elsafe QikFit power units and data solutions all within one tidy panel, allowing the cables to be kept separate in the two tiered cable tray. The basket panel also features an easy fit locking system to allow fast and easy installation and relocation without the need of separate screws or bolts.

The features of the cable tray system include:

- Extremely economical and versatile
- Quick and easy installation
- Easyfit locking system for the basket panels
- Power and Data are kept separate within the double tiered cable tray
- Made from strong powder coated steel
- Basket panels can accommodate Power, Data, AV solutions in various configurations
- Double tiered cable trays are available in the standard lengths of 750mm, 1250mm, and 1550mm lengths
- Single tiered cables trays are available on the standard length of 750mm
